## Saskatchewan Marathon Course Notes

The marathon has two sections that are out and back. We only measured these section in one direction (and used the same data for both the out and back).

In the portions of the course where the runners are restricted to one lane the course is marked with pylons and barricades and control by course marshals.

The course followed a winding roadway (restricted to one lane) and a winding trail. The course was measured following the tangent (shortest distance) on both the road and trail. (See corresponding diagram included with application)
